 - **Other:** Stored Procedures, Debugging, Deployment, Performance Optimization
-

Education

Bachelor of Computer Application (BCA)

Veer Narmad South Gujarat University | July 2022 – 2024

Experience

Software Developer – Suvya Web

January 2024 – Present

- Developed CRUD operations and integrated image upload using Angular and SQL procedures.
 - Built UI from Figma designs and integrated with .NET Core APIs.
 - Improved system performance, resolved bugs, and supported live deployments.
 - Used JIRA for sprint planning, and collaborated with QA teams.
-

Projects

Robo Rewards (RR) – Customer Loyalty Platform

A digital loyalty program system that helps businesses manage reward points, customer tiers, redemptions, and transaction history in an automated and scalable way.

- Backend developer using .NET Core and SQL Server.
- Developed APIs, business logic, and stored procedures for transaction handling.
- Ensured API authorization, fixed bugs, and supported live deployments.

Kitabee Keeda – Book Browsing Website (ReactJS)

- Built a React site with routing, state management, and component design.
- Designed intuitive UI and implemented seamless navigation.

Miss India – Franchise Booking & Tea Ordering (.NET Core)

- Built backend APIs and procedures for bookings and order flows.
- Automated processes to reduce queues and improve efficiency.

Other Projects – Angular (Demo)

- Built small-scale projects like ECommerce and Resume Builder apps.
- Practiced reusable components, API handling, and UI interactions.
